### Professor Ken Bradstock

BSc(med) MBBS PhD FRACP FRCPA

**Professor Ken Bradstock is currently the Chair of the Leukaemia Foundation's National Medical and Scientific Advisory Committee after becoming a member at the inaugural meeting in April 2000. He became the Leukaemia Foundation's National Medical Advisor and a member of the board in November 2003.**

Professor Bradstock is a clinical haematologist at Westmead Hospital in Sydney, and has had long-standing interests and involvement in clinical and laboratory research in hematological malignancies. He has been a Staff Specialist in Haematology and head of the Blood and Marrow Transplant Service at Westmead Hospital since 1981, and is a Clinical Professor in the Department of Medicine at the University of Sydney.

He was chairman of the Australian Leukaemia Study Group from 1993 until 1999, and was the founding chairman of the Australasian Leukaemia and Lymphoma Group in 1999-2003. He is currently Secretary of the Bone Marrow Transplant Society of Australia and New Zealand, and member of the Scientific Advisory Committee of the Australian Bone Marrow Donor Registry.

He has been involved with the Leukaemia Foundation of Australia since 1997, holding positions as National Medical Advisor and chairman of the National Medical and Scientific Advisory Committee, and member of the Board of the Leukaemia Foundation. He is a Trustee of the Anthony Rothe Memorial Trust, which provides research funding for haematological malignancies, and is chair of the Scientific Advisory Committee of that organisation. He was chair of the Allogeneic Working Party of the BMT Network NSW, and Medical Director of that organization from 2002-2005. He was Secretary of the Haematology Society of Australia and New Zealand between 1995 and 1999, and Co-ordinator of Advanced Training in Haematology during the same period. In October 2006, Professor Bradstock gave the Carl de Gruchy Oration at the Annual Scientific meeting of the Haematology Society, in recognition of his contribution to the profession.

Professor Bradstock has over 25 years experience in the design and conduct of clinical trials, and has led the development of national trials in acute myeloid and lymphoblastic leukaemias. In laboratory science, his research interests have focussed on the biology of acute lymphoblastic leukaemia (ALL), and in cellular immunotherapy in bone marrow transplantation.
